

# “In the Wild”

## Module 2, Warm-Up

EXPLORE IT

### Prompt:

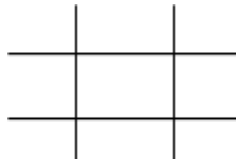

Use sticks, leaves, rocks, and other things from nature to play tic tac toe!

### Materials:

- 4 sticks, small rocks, or something to use for the board (you could also just draw a tic tac toe board with pencil or crayon on paper)
- 5 similar rocks, leaves, or something from nature to use for one player
- 5 similar (but different from the other 5!) rocks, leaves, or something from nature to use for the second player

### Instructions:

1. Take a walk outside to collect the materials you need for the game. You can use objects that you collected on a walk or find items around the house.
2. Ask someone to play the game with you. Set up your game board.

3. Decide which player will use which set of similar objects to play.
4. Play tic tac toe!
  - a. The goal of tic tac toe is to get three objects in a row (horizontally, vertically, or diagonally). To play, one person will put one of their objects in one of the squares. Then the next person places one of their objects in a different square. Continue this until someone gets three in a row!
